Pune

Education

■ Bachelor of Engineering (IT)

Savitribai Phule Pune University,
Pune. (2023-2027)
Aggregate: 8.314/10 CGPA

Version Control Tools

Git

Skills

Data Structures

Core Java

C++

SQL

Languages

English, Marathi, Hindi

ADITYA WATTAMWAR

Aspiring Software Developer

Aspiring **Software Developer** with **strong foundations in C++, Java, and core Data Structures & Algorithms.** **Skilled in object-oriented programming (OOP), sorting and searching techniques,** and writing clean, efficient code. Focused on building **strong programming fundamentals and continuously growing as a developer.**

Projects

1. **LegalSimplify – AI Legal Document Assistant** AI Legal Document Assistant **utilized Vite, React, TypeScript, Tailwind, shadow.ui, and Google Document AI** to create a **prototype** aimed at simplifying legal documents. This involved **AI-driven techniques for extraction, summarization, and risk detection.** Developed a scalable user interface supporting **real-time collaboration, annotations, and version control using sockets.** The frontend was deployed on Netlify, with a proposed architecture for secure, cloud-based document processing.
2. **Smart Trolley Billing System (RFID + IoT Automation)** leveraged **IoT, RFID, and Embedded Systems** to develop an **automated smart shopping trolley with real-time item detection using RFID/NFC and IoT modules.** Implemented a live billing system that processes items. Designed automated workflows to streamline RFID-based smart shopping systems and integrated key insights into the design by eliminating traditional queues.

Experience

Humalife Healthcare LLC

Feb 2026 – Mar 2026

• Data Processing Intern (Remote)

- Worked remotely with Google Sheets for **structured data entry, organization, and maintenance**
- Performed **data cleaning and basic validation to ensure accuracy and consistency of records**
- Coordinated tasks remotely while adhering to defined workflows and timelines

Achievements

Finalist at Talrop Technovate for India 2024 (hosted by The Times of India), where I **developed AgroTech Nexus, an innovative solution for farmers in Maharashtra integrating IoT-based monitoring, AI-driven crop analysis, and a FarmDirect marketplace** model. The project addressed critical agricultural challenges including monsoon dependency, credit constraints, and post-harvest losses by **proposing a scalable and practical framework.** I presented the concept to a national-level judging panel and was selected as a finalist.
